Supported Features

Currently Tonkean supports only:

- Service Provider (SP)-Initiated Authentication (SSO) Flow

Requirements

Customers should have an enterprise license.

You must be configured as the enterprise owner in Tonkean to set up OIDC with Okta.

Configuration Steps

1. Click on your profile at the upper left side
2. Press your organization Administration settings

The screenshot displays the Tonkean user interface. At the top left, the user profile is shown as 'A Tonkean Afik'. A dropdown menu is open, listing various options. The 'Tonkean Administration' option is highlighted at the bottom of the menu. An arrow labeled 'Step 1' points to the profile icon, and another arrow labeled 'Step 2' points to the 'Tonkean Administration' option. The background shows a dashboard with a 'First' board, 'Week View' and 'Filter' options, and a list of items including 'Saturn', 'asdadasdasdasd', 'Mars', 'Venus', and 'Neptune'.

Step 1

Step 2

3. Press the pencil to edit the preferred authentication method
